

## BROADCAST CONTENT SCREENING SERVICE SYSTEM AND METHOD

ABSTRACT:

The present invention provides a system for screening  
5 broadcast programming. A viewer is configured to receive  
broadcast programming and to present the broadcast  
programming to a user. An interface is configured to  
receive user input from a user, the user input comprising at  
least a content of interest start time based on the  
10 broadcast programming. A processor is coupled to the  
interface and configured to store the user input and to  
generate a screening signal based on the user input. In a  
particular aspect, a broadcast recorder is coupled to the  
viewer and configured to store the received broadcast  
15 programming.
